The future of your waste collection - Have your say

The Barossa Council is committed to reducing waste to landfill. Over recent years our waste disposal and recycling rates have fallen short of our targets.

To ensure our waste management system is sustainable into the future, we’ve been looking at better ways to manage our waste in the Council area.

We are exploring more ecologically sustainable ways of managing waste, to ensure we protect and preserve our environment for future generations, and we need your help.

We are seeking feedback from the community on three new options developed to reduce waste.

The options being presented differ for township residents and rural residents, but seek to enhance the “three bin system” which will allow us, as a Council, to divert landfill to composting and recycling.

We are urging you to think carefully about your role in waste management before you have your say.

Visit www.ourbetterbarossa.com.au for detailed information about each option and a comprehensive discussion paper. If you require additional information please call 8563 8444.

A few things to note:

*For the purposes of this consultation, township residents are defined as those who reside within a township 50kph speed limit zone; all others are considered rural residents.

**Cost estimates are the average cost over a seven-year contract starting in 2018-19 and are our best estimates at this time.

*** Where organics is listed as optional, the total cost in the table excludes the organics service.

How can I provide my feedback?

We value your feedback which is why there are several ways for you to Have your say!

Survey: Rank your preferred option from 1-4 below (1 being most preferred, 4 least preferred) and post back to us using this reply paid form.

Online Survey: via www.ourbetterbarossa.com.au

The consultation period will close at 5pm, Wednesday 7 June 2017.
TO THE HOUSEHOLDER

Have your say on how we can reduce our waste.

Think about ways we can change together to work less waste.
